

# Intro to Dryland Ecohydrology

{ **Structure** | **Function** } of vegetation

What choices do plants make regarding spatial organization when they are competing for a scarce resource?

Increasing variance in vegetation density

# Intro to Dryland Ecohydrology

{ **Structure** | **Function** } of vegetation

More arid  
landscapes  
(low LAI) are  
associated with  
clumped  
vegetation...  
how is this  
related to water  
use and water  
scarcity?
